

PRESS RELEASE

Alleviate Back and Neck Pain through Restored Function

Proven Spine Care Technology

Gold Coast – MXS Australia presents - SpineX SpineCare

Thousands of Australians suffer from chronic lower back and neck pain. Patients who have failed previous treatment options can find relief from one or two twenty minute therapy sessions per week. The **MXS Australia SpineX SpineCare Clinic** is helping reduce or eliminate patient's pain through their SpineX SpineCare System.

MXS has brought to Queensland's Gold Coast the only Medical Lumbar and Cervical Extension computerised spine stabilisation machines capable of Testing, Restoring and Evaluating Spinal Function. These fifty thousand dollar each medical devices feature elaborate mechanisms to isolate, target and objectively report function of the spine.

However described this system provides the only functional therapy able to accurately measure and safely strengthen spinal function. Extensive development began decades ago and is supported by millions of dollars of independent university based research.

In a recent insurance case, a car accident victim diagnosed with serious spinal injuries was informed that surgery would be necessary. After 6 weeks treatment on the MXS Program the patient went from very poor tested function, with considerable pain, to achieving better than normal test results along with significantly reduced pain levels. This person is now not having surgery and has returned to the work force.

Further Testimonial - After four back surgeries, a knee replacement and a recent neck fusion, a retired 75 year old Veteran Army Officer says. "I have attended the MXS Program for some time and highly recommend this system. My function greatly improved, pain was alleviated, my golf handicap went down to 14 and I have been able to drive the car to Sydney and back without any problems."

Patient/clients are medically supervised while clinical sessions are appointment based and fully supervised by certified health professionals.

With 20 minutes per session, once or twice a week, patients/clients are dramatically improving their spinal health and overall quality of life.

For more information about how the **MXS SpineX SpineCare System** can relieve your chronic low back or neck pain, contact the clinic on **5679 3608** or go to **www.mxs.com.au** –

You'll be impressed!
